<p>Technical Assistance:</p>	<ul style="list-style-type: none"> • Tamwilcom

<p>Short Background of the Fund</p>	<p>Green Invest is a Moroccan financial initiative designed to co-finance the acquisition of tangible and intangible assets, technical installations, and constructions for Moroccan companies that are not undergoing judicial recovery or liquidation. It focuses on productive sectors, excluding real estate development and offshore fishing. Eligible projects include renewable energy production, energy efficiency, waste management, and pollution control, with a requirement for a technical expertise validation by the bank and Tamwilcom. Co-financing is paired with bank loans, covering up to 40% of the investment by Green Invest with a cap of 10 million Moroccan Dirhams (MDH), and requires a minimum of 20% self-financing by the company. The credit terms offer up to 12 years of maturity with a maximum 4-year grace period on the principal, and a 2.5% annual interest rate for Green Invest's portion, excluding VAT. Applications for funding are to be submitted through participating banks, and further information can be found on their website, www.tamwilcom.ma.</p>
<p>How to apply?</p>	<p>To apply for the co-financing offered by Green Invest, companies must submit their applications through their respective banks. The banks, in turn, have signed an agreement with the Tamwilcom Fund to facilitate this process. It is through this banking intermediary that the application for co-financing will be processed and evaluated. https://www.tamwilcom.ma/fr/tamwilcom/partenaires</p>
