<p>Short Background of the Fund</p>	<p>It is a €163 million financing initiative established by EBRD) supported by the European Union (EU) and Green Climate Fund (GCF). Building on the successful implementation of the MorSEFF program from 2015 to 2021, GEF II operates as an intermediated financial program. It offers financing to local participating financial institutions (PFIs), enabling them to provide funding to private enterprises in Morocco for green investments. These investments encompass sustainable energy (including energy efficiency and renewable energy), water conservation, waste reduction, green buildings, circular economy initiatives, and soil erosion protection. Moreover, there is potential for additional project eligibility for retail borrowers such as individuals, households, and cooperative organizations, particularly for green home investments focused on energy efficiency and renewable energy. For further inquiries about this option, please contact the consultant.</p>

How to apply?
