<p><b>Short Background of the Fund</b></p>	<p>The Green for Growth Fund (GGF) is an impact investment fund established in 2009 to address climate change and promote sustainable economic growth. Operating across 19 markets in Southeast Europe, Turkey, the European Eastern Neighbourhood Region, and the Middle East and North Africa, the GGF utilizes a blended finance structure, combining public and private capital to increase investment volumes in regions and sectors with limited flows. Through investments in measures that reduce energy consumption, resource use, and CO<sub>2</sub> emissions, the fund aims for at least a 20% reduction in energy consumption and/or CO<sub>2</sub> emissions while also addressing water, waste, and material inputs. With a dedicated Technical Assistance Facility, the GGF provides expertise to ensure successful implementation and raise awareness about energy efficiency and renewable energy, thereby fostering green finance in the market.</p>
<p><b>How to apply?</b></p>	<p>Contact Finance in Motion GmbH for details.</p>
